Matheus Alexandre

Full Stack .NET Developer · Brazil

matheusalexmc@gmail.com · matheusalexandre.dev · linkedin.com/in/matheus-alexandre-marques · github.com/Mathows

SUMMARY

.NET developer with 4+ years building and maintaining business-critical systems — ERP, e-invoicing and receivables — with C#, .NET and SQL Server. Strong in SQL Server performance tuning, production troubleshooting and data integrity, with an evidence-first approach: measure before fixing, ship small reversible changes and validate before release.

EXPERIENCE

Full Stack Developer — Titaniumfix 2022 — Present

Brazil · On-site

Develop and maintain the company's in-house ERP (orders, inventory, finance and billing) and an integrated fiscal and financial platform for e-invoicing (NF-e), bank slips and receivables.

- **80× performance gain:** rewrote a cursor-based critical routine as set-based MERGE ... OUTPUT, replacing hundreds of row-by-row statements with 2 batch operations (~87 s → 1.1 s).
- **Data integrity:** traced duplicate records to users retrying operations that had timed out but succeeded; prevented them with sp_getapplock and a UI lock.
- **Scalability:** rebuilt a listing screen that froze on large data volumes with database-side paging and sorting via typed stored procedures.
- **Integrations:** migrated bank slip issuance from a legacy COM component to a modern REST API.
- **Production debugging:** found a stale NHibernate session overwriting stored-procedure updates (fix validated with 7 test scenarios); made the data layer preserve original exceptions.
- **Regulatory:** delivered alphanumeric CNPJ (IN RFB 2.229/2024) across two systems and UDI-DI traceability; analyzed Brazil's Tax Reform rules for NF-e returns.

Stack: C#, .NET Framework 4.8, .NET Web API, ASP.NET Web Forms, SQL Server, NHibernate, EF Core, DevExpress, Git

PROJECTS

Dima — Personal Finance · github.com/Mathows/dima-controle-financeiro

- Income and expense tracking with a monthly-charts dashboard and a premium plan paid via Stripe.

Stack: .NET 8 API, Blazor WebAssembly, MudBlazor, EF Core, SQL Server, Stripe

Vieira Solutions · solutionsvieira.com.br

- Agency website in production, with database-backed lead capture and automated e-mails.

Stack: .NET 10 API, Blazor WebAssembly, MudBlazor, EF Core, SQL Server, MailKit

SKILLS

Back-end	C#, .NET, ASP.NET Core, Entity Framework Core, Dapper, REST APIs
Front-end	Blazor (WebAssembly & Server), React, TypeScript, MudBlazor, DevExpress
Data	SQL Server (set-based T-SQL, procedures, triggers, indexing, locking, tuning), NHibernate
Cloud & Tools	Azure, Docker, Git, .NET MAUI
Languages	Portuguese (native) · English (basic, currently studying)

EDUCATION

Technologist Degree in Systems Analysis and Development — Universidade Paulista (UNIP) 2024

CERTIFICATIONS — BALTA.IO

Fundamentals of Blazor WebAssembly, ASP.NET 6, Entity Framework, C# and .NET · Data Access with Dapper & SQL Server (2023–2024)
